

For Professional use only

MARLDON MXC750 FLOOR REMOVER

PRODUCT DESCRIPTION

MARLDON MXC750 REMOVER effectively removes MARLDON REVIVER MXC 740 and many other similar types of floor polish from pre-lacquered wooden floors. Also used for the removal of stubborn stains, black heel marks and grease build up. MARLDON REMOVER removes all traces of MARLDON REVIVER MXC 740 allowing for further coats of compatible lacquer. A test area of lacquer must always be tried first for compatibility.

Colour:

MXC 750 pink.

Fields of application:

May be applied on all types of pre-lacquered wooden floors with the exception of unsealed wood, unsealed cork, oiled or magnesite composition floors.

Application procedure:

Mix 1 part MARLDON REMOVER to 5 parts of clean water.

For stubborn stains and grease build up mix 1 part MARLDON REMOVER to 2 parts of clean water.

Remove loose dirt and debris from the floor area and apply evenly to the surface with a Marldon applicator, cloth or orbital cleaning machine.

Allow MARLDON REMOVER to penetrate the MARLDON FLOOR REVIVER MXC 740 for 2 – 3 minutes.

Afterwards it is essential to go over the floor with clean water and clean dry cloths.

IMPORTANT – keep the amount of water to a minimum as it can penetrate the wood and cause swelling.

Physical properties:

Viscosity: fluid (liquid)

Odour: mild neutral fragrance.

Storage properties:

Practically unlimited if stored under frost free conditions. Store in a well ventilated area.

Coverage capacity:

80m² per litre as concentrate.

Very economical in diluted form.

Health and safety advice:

Keep out of reach of children. Do not bring into contact with victuals and animal food. Do not fill into containers normally used for food and drink. In case of contact with eyes rinse immediately with plenty of water and consult a Doctor.

Refer to health and safety sheet for further information.
